

# UX/UI design, Prototypes & frontend development

My name is **Marc Zamora**, born in 1976 in Barcelona. I currently live in Mataró (BCN).

Always passionate about the **visual arts** and **communication** I decided to merge these two fields of my interest and specialize in graphic design as a form of visual communication.

In recent years I have focused my work in the online world: **website design**, **mobile apps**, **banner campaigns**, **interface design**.

I'm really interested in **UX** techniques and methodologies, and I usually deal with Vue for my **frontend development**.

I love **coffee**.
